INTRODUCTION

WHAT IS THE MNS FOR PHARMACEUTICAL STARTING MATERIALS/ESSENTIAL DRUGS?

In 1986, the World Health Assembly laid before the Organization the responsibility to provide price information on pharmaceutical starting materials. WHA 39.27 endorsed WHO's revised drug strategy, which states "... strengthen market intelligence; support drug procurement by developing countries..." The responsibility was reaffirmed at the 49th WHA in 1996. Resolution WHA 49.14 requests the Director General, under paragraph 2(6) "to strengthen market intelligence, review in collaboration with interested parties information on prices and sources of information on prices of essential drugs and starting material of good quality, which meet requirements of internationally recognized pharmacopoeias or equivalent regulatory standards, and provide this information to members states".

MNS FOR PHARMACEUTICAL STARTING MATERIALS IS AIMED AT YOU:

- If you need to purchase pharmaceutical active ingredients to produce essential drugs at reasonable cost;
- If you wish to stay informed about worldwide prices;
- If you need a guide to compare market prices and for your negotiations;
- If you want to access new sources of supply.

HOW TO READ THE PRICES GIVEN IN THE MNS REPORT

- This month's prices with an "*" after the delivery time are quoted CIF at main European ports.
- Unless otherwise stated, all indicative prices are quoted FOB in US\$.
- The terms of payment, final delivery times, etc., are to be negotiated directly between buyer and seller.
- The prices quoted with an "*" in the 'country of origin' column refer to products for which the seller/broker has several possible sources, information on the exact source being available from the seller to prospective buyers at the time of ordering.

ASSURING QUALITY

In this publication, quality is expressed in terms of pharmacopoeial standards, when available¹. When the pharmacopoeial standard is indicated as quality standard, the latest edition of the pharmacopoeia would apply.

In accordance with the principles of good manufacturing practices (GMP), it is the dosage form manufacturer who must assume responsibility for the quality of the final pharmaceutical products. The acceptability of each starting material has to be established by developmental (pre-formulation, development of pharmaceutics) studies and confirmed through validation programmes for manufacturing processes. The Information Providers screened by MNS, are those that exhibit their dedication to quality assurance by maintaining up to date ISO 9000 certification, conform to WHO GMP requirements and fulfill minimum batch certification and labeling requirements. MNS collects data from Information Providers on the following:

- (a) Batch certificate that meets the following minimum requirements including:
 - Name and batch number of the Pharmaceutical Starting Material
 - Name and address of the manufacturer
 - Manufacture and expiry date/retest date
 - Type of container
 - Net weight of the content per container and the number of the containers
 - Date of latest analysis
 - Quality specifications
- (b) Minimum labeling requirements for Pharmaceutical Starting Materials including:
 - Name of Pharmaceutical Starting Materials
 - Batch number
 - Name and address of manufacturer
 - Specification of active materials
 - Expiry or retest date
 - Storage indication
 - Name of supplier if applicable

The MNS does not guarantee the quality of the substances listed in this report. Licensing authorities in the respective countries of manufacture are expected to be responsible for the review and approval of the detailed composition and formulation when authorizing a pharmaceutical product to be marketed, including the specifications of its ingredients, as submitted by the manufacturer of the dosage form and oversee compliance with GMP requirements as recommended by WHO

1 The list of covered products includes additives and fillers for which no pharmacopoeial standards is available.

INTRODUCTION

QU'EST-CE QUE LE SNM POUR LES MATIÈRES PREMIÈRES PHARMACEUTIQUES/ET LES MÉDICAMENTS ESSENTIELS?

En 1986, l'Assemblée mondiale de la santé a confié à l'OMS la responsabilité de fournir des informations sur les prix des matières premières pharmaceutiques. Dans sa résolution WHA 39.27, elle a approuvé la stratégie pharmaceutique révisée de l'OMS qui vise à "... améliorer la connaissance du marché; faciliter l'achat de médicaments par les pays en développement... ". Cette responsabilité confiée à l'Organisation a été réaffirmée à la quarante neuvième Assemblée mondiale de la santé en 1996. Dans la résolution WHA 49.14, il est demandé au Directeur général, à l'alinéa 6 du paragraphe 2, "d'améliorer la connaissance du marché, d'examiner, en collaboration avec les parties intéressées, l'information sur les prix et les sources d'information concernant les prix des médicaments essentiels et des matières premières de bonne qualité, répondant aux exigences des pharmacopées internationalement reconnues ou à d'autres normes réglementaires équivalentes, et de communiquer cette information aux États membres".

LE SNM POUR LES MATIÈRES PREMIÈRES PHARMACEUTIQUES PEUT VOUS ÊTRE UTILE:

- Si vous devez acheter des principes actifs pour fabriquer des médicaments essentiels à un coût raisonnable;
- Si vous souhaitez vous tenir informé des prix mondiaux;
- Si vous avez besoin d'un guide pour comparer les prix du marché et mener vos négociations;
- Si vous souhaitez avoir accès à de nouvelles sources d'approvisionnement

COMMENT LIRE LES PRIX INDIQUÉS DANS LE RAPPORT DU SNM

- Les prix pour lesquels le délai de livraison est suivi d'un "*" s'entendent CAF aux grands ports européens.
- Sauf indication contraire, tous les prix indicatifs s'entendent FOB en dollars des États Unis.
- Les conditions de paiement, le délai final de livraison, etc., sont à négocier directement entre l'acheteur et le vendeur.
- La présence d'un "*" dans la colonne pays d'origine indique des produits pour lesquels le vendeur/courtier dispose de plusieurs sources possibles; la source exacte est précisée par le vendeur aux acheteurs potentiels lors de la commande.

ASSURANCE QUALITÉ

Dans cette publication, la qualité est exprimée par rapport aux normes de la pharmacopée, lorsqu'il en existe¹. Lorsque la norme de la pharmacopée est indiquée comme norme de qualité, c'est l'édition la plus récente de la pharmacopée qui s'applique. Conformément aux principes des bonnes pratiques de fabrication (BPF), le fabricant de la forme galénique assume la responsabilité de la qualité du produit pharmaceutique fini. L'acceptabilité de chaque matière première doit être établie par des études préliminaires (pré-formulation, mise au point des produits) et confirmée par des programmes de validation pour les procédés de fabrication. Les fournisseurs d'information retenus par le SNM font la preuve de leur engagement vis-à-vis de l'assurance qualité en tenant à jour leur certification ISO 9000, en respectant les bonnes pratiques de fabrication de l'OMS et en satisfaisant aux prescriptions minimales relatives à la certification et à l'étiquetage des lots. Le SNM recueille des données auprès des fournisseurs d'information sur les points suivants:

- a) Certificat de lot qui répond aux exigences minimales suivantes:
Nom et numéro de lot de la matière première pharmaceutique
Nom et adresse du fabricant
Date de fabrication et date limite d'utilisation/date de contre-essai
Type de récipient
Poids net du contenu par récipient et nombre de récipients
Date de l'analyse la plus récente
Spécifications de qualité

- b) Prescriptions minimales d'étiquetage pour les matières premières pharmaceutiques:
Nom de la matière première pharmaceutique
Numéro de lot
Nom et adresse du fabricant
Caractéristiques des principes actifs
Date limite d'utilisation ou date de contre-essai
Conditions de conservation
Nom du fournisseur le cas échéant

Le SNM ne garantit pas la qualité des substances mentionnées dans son rapport. Les services chargés de délivrer les autorisations dans chaque pays de fabrication sont supposés, lorsqu'ils autorisent la commercialisation d'un produit pharmaceutique, en examiner et approuver la composition et la formulation détaillées, y compris les caractéristiques de ses constituants, telles qu'elles sont présentées par le fabricant de la forme galénique et contrôler le respect des BPF recommandées par l'OMS.

¹ La liste des produits couverts comprend certains additifs et excipients pour lesquels il n'existe pas de norme dans la pharmacopée.

INFORME

PUBLICADO EL 28 DICIEMBRE 2007

Numero 189

INTRODUCCIÓN

¿QUÉ ES EL SNM DE MATERIAS PRIMAS FARMACÉUTICAS Y MEDICAMENTOS ESENCIALES?

En 1986, la Asamblea Mundial de la Salud encargó a la Organización que facilitara información sobre los precios de las materias primas farmacéuticas. En su resolución WHA 39.27, la Asamblea de la Salud aprobó la estrategia revisada de la OMS en materia de medicamentos, en la que se dice "... que mejore la información sobre el mercado; y que se apoye a los países en desarrollo en la compra de medicamentos...". Esta responsabilidad se reiteró en la 49^a Asamblea Mundial de la Salud, celebrada en 1996. En el párrafo 2 (6) de la resolución WHA 49.14, se pide al Director General "que mejore la información sobre el mercado, que examine en colaboración con las partes interesadas la información sobre precios y las fuentes de información sobre los precios de los medicamentos esenciales y las materias primas de buena calidad que satisfagan los requisitos de las farmacopeas internacionalmente reconocidas o de normas reglamentarias equivalentes, y que proporcione esa información a los Estados Miembros".

EL SNM DE MATERIAS PRIMAS FARMACÉUTICAS LE INTERESA SI:

- Necesita comprar principios activos farmacéuticos para fabricar medicamentos esenciales a un costo razonable;
- Desea estar informado sobre los precios mundiales;
- Necesita una guía para comparar los precios de mercado y para sus negociaciones;
- Desea encontrar nuevas fuentes de suministro

CÓMO CONSULTAR LOS PRECIOS QUE APARECEN EN EL INFORME SNM

- Los precios de este mes, con el plazo de entrega seguido de "", son precios CIF hasta los principales puertos europeos.
- Salvo indicación contraria, todos los precios indicativos son precios FOB en dólares de los EE.UU.
- Las condiciones de pago, plazos definitivos de entrega, etc., deben negociarse directamente entre comprador y vendedor.
- Los precios con "*" en la columna "país de origen" se refieren a productos que el vendedor o agente puede obtener de diversas fuentes, disponiendo el vendedor de información sobre la fuente exacta para los posibles compradores en el momento de hacer el pedido.

GARANTÍA DE CALIDAD

En esta publicación, la calidad se expresa, siempre que sea posible, con arreglo a las normas de la farmacopea¹. Cuando la norma de la farmacopea figura como norma de calidad, ésta se refiere a la última edición disponible.

Con arreglo a los principios de las Prácticas adecuadas de fabricación (GMP), la responsabilidad por la calidad de los productos farmacéuticos finales recae en el fabricante de las formas farmacéuticas. La aceptabilidad de cada materia prima debe establecerse por medio de estudios de desarrollo (preformulación y desarrollo farmacéutico) y confirmarse mediante programas de validación de los procesos de fabricación. El SNM selecciona aquellos proveedores de información que demuestran su determinación de garantizar la calidad manteniendo al día la certificación ISO 9000, observando las normas GMP de la OMS y cumpliendo los requisitos mínimos en materia de certificación de partidas y etiquetado. El SNM solicita a los proveedores de información los datos siguientes:

- a) Un certificado de partidas que cumpla los siguientes requisitos mínimos:

Nombre y número de partida de la materia prima farmacéutica
Nombre y dirección del fabricante
Fecha de fabricación y de caducidad/fecha de reprobación
Tipo de envase
Peso neto del contenido por envase y número de envases
Fecha del análisis más reciente
Normas de calidad

- b) Requisitos mínimos de etiquetado para materias primas farmacéuticas:

Nombre de las materias primas farmacéuticas
Número de partida
Nombre y dirección del fabricante
Descripción de los principios activos
Fecha de caducidad o de reprobación
Instrucciones de almacenamiento
Nombre del suministrador, si procede.

El SNM no garantiza la calidad de las sustancias que figuran en este informe. La responsabilidad de examinar y aprobar la composición y formulación detallada de los productos farmacéuticos cuya comercialización vaya a autorizarse recae en los servicios de homologación de cada país productor. Ello se refiere también a la descripción de los ingredientes que presenta el fabricante de la forma farmacéutica y el control del cumplimiento de los requisitos GMP que recomienda la OMS.

¹ La lista de productos abarca algunos aditivos y excipientes sobre los que no existen de la farmacopea.
